

**Polsinelli Shalton & Welte Implements eRoom /  
Hummingbird Integration by Matrix Logic**

**May 6, 2003**

**FOR IMMEDIATE RELEASE**

Kansas City, Missouri - Matrix Logic Corporation, a leading software integrator of electronic document management and collaboration systems, has announced that Polsinelli Shalton & Welte, a leading Midwest law firm, has implemented *eRoom Service for Hummingbird* to facilitate secure online collaboration with its clients.

*eRoom Service for Hummingbird* extends Hummingbird document management systems (DOCS Open, PowerDOCS or Hummingbird DM5) with seamless integration with the web-based eRoom collaboration product by Documentum. Attorneys, paralegals and legal secretaries can easily grant and control access to critical business documents on specific cases and matters directly from their existing document management system interface.

"Client service is job one at Polsinelli Shalton & Welte" noted Gino R. Serra, an attorney at the firm. "We needed a way to collaborate on important client matters with co-counsel and clients without paper-based delays or reconfiguring our network. Matrix Logic's solution brings us closer to our clients, and we view that as critical to our firm's success."

Beth Bertke, Director of Information Technology, noted that systems that work in the way that attorneys work are the ones that are ultimately successful. "As the firm continues to grow, it is critical that attorneys can access the information they need and share it effectively internally as well as beyond the firewall. Matrix Logic is a valued partner in helping the firm realize this goal."

"We are very pleased that Polsinelli Shalton & Welte has implemented eRoom Service for Hummingbird" said Stephen Page, President of Matrix Logic Corporation. "The firm joins a growing list of law firms and professional service organizations that utilize our product line to enhance collaboration and information security automation."
