

MLC BatchOCR Server

En-masse OCR and automatically Full-text Index all your scanned documents. Your eDOCS DM library is a great place to save scanned images economically. With BatchOCR it is now even easier to find these images later.

Features

- Automatically creates an Optical Character Rendition (OCR) version or attachment for all specified image and PDF files saved in an eDOCS DM library
- Produces rich text format for searchable PDF attachments
- Runs as a Windows Service for unattended operation
- Optical re-recognition if image is edited
- Works with any image application
- OCR Engine supports 30 languages, many with automatic spelling detection and correction

Benefits

- Time saving
- Greater search accuracy
- Automatic rendition update
- Automatic full-text indexing
- Optional conversion of TIF to searchable PDF
- Effortless back file OCR
